No New Legislation If Vote Fails, Freeman Says

By: Jack Owen

Washington· Secretary of Agriculture, Orville Freeman, said this week he will not ask for any new wheat legislation if the May 21 referendum fails.

Speaking at a conference of the National Farm Editors Association here, the Secretary said congressional leaders have indicated to him that there will be no new legislation if the referendum on the administration's bill does not receive the needed two thirds vote from wheat farmers.

He said he believes farmers are beginning to understand the proposal and the alternatives they face if the proposal is turned down. "As the word gets out, prospects for passage of the referendum climb steadily."

Senator Allen Ellender of Louisiana said, "Put this in big, bold print for your farm

Feed Grain Bill Passes House

The House of Representatives Thursday passed the 1964 feed grains bill by a vote of 208 to 196 to extend present feed grain regulations with some modifications.

Opponents of the bill attempted to have the vote delayed until after the May 21 wheat referendum, saying the passage of the feed grain legislation would effect the outcome of the wheat vote.

Opponents also charged that the bill gives too much power to the secretary of agriculture Only one Republican congressman voted for the bill while 28 democrats cast negative votes.

Supporters of the bill contended that wheat farmers would be "voting in the dark" if asked to cast ballots in the referendum without knowing the outcome of the feed grains bill.

The bill now goes to the senate where it is expected to pass with very little modification.

Senator Says Dairy Bill Will Up Quality Production, Cut Excess

Producers of high quality milk will receive a premium under the proposed dairy legislation now under consideration by congress, Senator Allen Ellender, Democrat from Louisiana, chairman of the Senate Agriculture Committee told farm editors this week.

In a conference with National Farm Editors Association in Washington Monday, Ellender said, the new dairy legislation is an attempt to "go back to the original intent of the 1937 law to give producers of high quality fluid milk protection in the market."

He said the new bill would do away with a blend price and emphasize grade A production. Under the proposed legislation support prices could range from zero to 90 per cent of parity, but, Ellender said "I'm willing, in order to get a bill passed, to leave the supports at 75 to 90 per cent as they now are."

"It is not the intent of the law," he said, "to establish national marketing quotas"

Charles Murphy, undersecretary of Agriculture said the bill proposed to let the producer keep his share of the Class I milk market without producing excess milk. The blend price feature of existing marketing orders is an incentive to produce excesses. He explained that voluntary cutbacks in production, under the proposed bill, would not decrease the dairyman's share of the class I market, but any increase in production would be under the class III price.

"Perhaps some marginal producers can not produce milk at the manufacturing price." Ellender said. This would force some producers out of the dairy picture, but "I'm against price supports when you can't control production." he said.

Ellender said he expected that the legislation would be sub-

U.S. To Spend $50 Million On Recreation In 10 Years

By: Jack Owen

The United States may spend as much as $40 or 0 million for the developm of recreational facilities in the next ten years, a United States Department of agriculture said this week.

John Baker, Assistant Secretary of Agriculture, told a meeting of the National Farm Editors Association in Washington, this amount would be needed to develop rural recreational facilities to supplement the badly overcrowded facilities now in existance, but he believes most of the money would come from private sources.

In explaining the administration's Rural Areas Development program, he said. "There is no separate burget in the Department of Agriculture for recreation" Some of the money for the proposed changes will come from the real estate development and operating budget and the cropland diversion program in the department of agriculture, and from the Interior Department and the Army Engineers.

He said we have come to the conclusion that conservation is an end in itself — a moral obligation "We don't want to pay too much for the program, but we are willing to make an investment"

If we do not aim at raising the standard of living in rural areas, we are not aiming high enough, he explained. There are now 4 million unemployed persons in rural areas now and estimates indicate that the figure could reach 8 million — almost equal to the number

David Lapp To Speak For Sr. Extension

J. David Lapp will relate his New Zealand travel experiences to the Lancaster County Senior Extension Club at its monthly meeting to be held Thursday, May 2, 1963, at the Production Credit Association Building, 411 West Roosevelt Road, Lancaster, at 8·00 p m.

Mr. Lapp recently returned from New Zealand where he spent 6 months under the In-

(Continued on Page 14)

FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average near the normal range of 46 at night to 67 in the afternoon. Cool weather at the beginning of the period is expected to give way to a warming trend at the middle and latter part of the period. Precipitation is expected to total 0.1 to 0.5 inch falling mainly as showers or thundershowers toward the end of the period.

April, thus far, is the driest on record with less than a half inch of raintall in the city of Lancaster.

LANCASTER POULTRY CENTER

Prices Up On Broilers

Live broiler prices at the Lancaster Poultry Center this week dropped almost a full cent but volume nearly doubled from last week and all lots on offer were sold

At the April 25 auction 19 lots including 100,850 head of broilers changed hands at prices ranging from 15 5 to 17.7 for a sale average of 15.-67. Last week's average was 16.53 when only 52,000 head were sold.

Three lots of pullets including 6,850 head sold at 20 1 to 22.3, and a lot of 2,400 heavy fowl brought 17 cents a pound.

The complete sale offered and sold 110,100 head in 23 lots.

Following is the complete sale report with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price.

● Delmarva

Prices Gain Demand Fair

Live broiler prices in Delmarva increased slightly during the 24 hour period ending 10 30 Friday morning Demand remained fair for the heavy offerings.

Broilers at the farms ranged 14 7 to 15 4 for 1,154,300 head reported sold including 603,700 head sold at Thursday's auction in Selbyville, Del

Estimated slaughter by eastern shore processors for the week end was 715,000 head compared to the 802,100 head last week end.

The Delmarva broiler-feed ratio for the week ending April 19 was down one point to 3.2. Broilers during the week averaged 16.12 per pound and mash cost the grower $99.31 per ton.

From Where We Stand . . .

Everything In Its Place

A place for everything, and everything in its place.

This precept was one of the most difficult ideas we ever had to teach boys in vocational agriculture. But once the idea got across to the boys, they realized that a place for everything and everything in its place saves time, energy, frustration and short tempers.

Before such a system can hope to work, there has to be a plan. If there is a place for everything, even if everything is in its place, the system may be inefficient. The system WILL be inefficient if the place for everything is not arranged properly.

If the place you have for everything is a junk box, even though everything is in its place, you will still have a junk box.

Let's just change it a bit and say, "A place for everyone and everyone in his place."

A few years ago there was a saying, "The city is a consumer of people and the country is a producer." Now the city is sending the people back — with a vangance.

Every day a few new houses spring up in what was recently productive farmland. Everywhere you look in Lancaster County housing developments or single new houses dot the landscape. While the county is continually gaining population, the city of Lancaster itself is actually losing people.

We believe there is a place for everyone. We believe Lancaster County deserves to be something better than a junk box with everything piled hodge-podge on top of itself. We are making a place for everyone, but if we go on willy-nilly building houses wherever fancy dictates, we will have a county no better than the toolbox of the carpenter who just throws his tools in the box.

At a recent meeting of Township Supervisors, sponsored by the Lancaster County Soil Conservation District, Bickley Foster, Director of the County Planning Commission, said farmers tend to think of zoning as something that applies to city dwellers. Farmers must begin to think of zoning as something that is of and for the farmers.

Several townships have zoning laws. Several more have recently appointed zoning commissions, but most of them have no planning boards. The commissions have planned a place for everyone, but in most cases they have created little more than a junk box with a place for everyone, but no order or reason to the arrangement of the placing.

If you grow tired of the mess in a junkbox of tools, it is easy to throw the whole mess out and begin with a new plan, but when you are dealing with permanent dwellings and the established homes of human beings, a junk box can not be junked just because we grow tired of it. With communities, you just have to hope the plan comes before the junk box gets too full.

"I know how you can keep the tools where they belong," a student of vocational agriculture said when we complained that things were not in their place; "Make shut the door, and nail it closed."

That might be one answer. We might say no more houses could be built in our rural communities, but soon the community would cease to grow. And when a community does not grow, it goes backwards.

We can not "make shut the door and nail it closed", but we can see that there is an orderly place for everyone, farmers and urban dwellers alike, and we can see that everyone fits in his place.

This we must do if we hope to remain the strong agricultural community we have always been.

At least that's how it looks from where we stand.

Sell Cows Locally

Where is the market for surplus dairy cows?

Some local dairymen feel that they should advertise in national publications in order to dispose of the increase in their herds.

A recent report from the Holstein-Friesian association shows that there is very little reason to advertise outside the Keystone state. The market is right here.

In 1960, Pennsylvania breeders of Holstein cattle sold 7,072 registered females. Of course, 6,688 went to other breeders within the state. Only 136 went to Maryland, 82 to New York, and 166 to other states.

But where do Pennsylvania Breeders go to buy their replacements? In the same year, 6,688 cows were bought in the state, 150 in New York, 128 in Maryland, 92 in Wisconsin and 69 head from all other states. In other words, about 93.7 per cent of all the Holstein cattle purchased in Pennsylvania came from farms in the state.

Pennsylvania imports about as many Holsteins from Canada as any state, but even this market is on a downward trend. From 1959 to 1962, the number of cows imported to the state dropped from 3,885 to 3,003.

The market for dairy cows is right here. Except on very rare occasions, it is a waste of money to advertise dairy cows anywhere but right here at home.

At least that's how it looks from where we stand.

★ ★ ★ ★

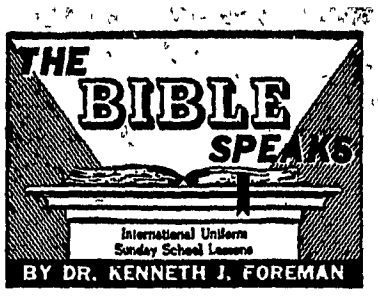
Our National Agriculture — Dr. Karl Brandt of Stanford University says that farmers manage half of all the private business in the U.S., and farmers' assets nearly equal the value of all stocks listed on the New York Stock Exchange. He says further that gross income in 1961 was $49 billion (on and off farm), nearly as much as the whole U.S. defense budget.

★ ★ ★ ★

I'm Confused — The Priest River, Ida. Times makes this acute observation: "Historians tell us about the past and economists tell us about the future. Thus only the present is confusing."

★ ★ ★ ★

Big Meat Eaters — January inventory of cattle and calves on farms and ranches was 103.7 million — 4 percent more than a year ago; milk cows and dairy replacement heifers down 2 percent; but other cattle, mostly beef, were up 6 percent. We eat one-third of all the meat consumed in the world annually.



Personal Trust

Lesson for April 28, 1963

Bible Material: Psalms 23; 46.
Devotional Reading: Psalm 27:1-3, 7-8, 13-14.

MANY signs have been suggested to help tell the difference between genuine religion and imitations. One of the best takes the form of an old saying: "Religion is never real till it gets into the first person singular." That is to say, religion at the talking stage, if that is the only stage, is not yet vital. An atheist and the Pope could talk about religion till they both were tired; but the Pope would be talking from inside Christian experience and the atheist talking from outside it. So even if the atheist were a better debater than the Pope, his arguments would not be worth much, because he is talking about something to which he himself is a stranger. Religion to be real must be lived, personally lived.

Dr. Foreman

Personal trust

There are three essentials for personally experienced religion. 1. Personal trust. 2. Personal Pledge. 3. Personal Performance. These have to be essentially personal or they are not genuine.

This week's study is about that first point: personal trust. The two Psalms selected, 23 and 46, both breathe a strong spirit of confidence in God. But observe what this confidence means. It does not mean assurance that no harm will come to the believer. It does mean confidence that whatever comes to the believer, he can take it, because he trusts in the God who is over all. There are two kind of freedom from fear; one rests on an assurance that there is nothing to be afraid of, the other rests on the assurance that although there may be, and probably will be, fearful things ahead, with God by our side we may be sure nothing is going to be stronger than He. The writer of the 23rd Psalm knows there is a Valley of the Shadow Death. The writer of the 46th Psalm knows the kingdoms of the world may totter and the earth melt. But neither Psalmist turns pale or trembles at such thoughts. "I will not fear for Thou art with me," says one. "The Lord of hosts is with us," sings the other. If your fears are your own, so is your trust, if it is real.

Fear of death

The one disaster facing us all, the one dark experience of which we may be certain at every moment of our lives, is that one day we each must die. If this be cause for fear, then we must live all our lives in fear. Some other calamities we dread may not come to pass, but our own deaths certainly will. Now both these Psalmists, of Psalm 23 and 46, knew death awaited them. The first one uses the words "all the days of my life." This is another way of saying "till the day I die." The second psalmist draws a kind of picture of the modern world, does he not? with wars and earthquakes and tidal waves, a world where sudden death is common. Yet again neither poet is disturbed or alarmed. The 23rd Psalm in particular appears to point beyond death to a "forever" with God.

The essential you

If you trust in God, is it true that you will not suffer harm? Many persons think that this is true. Then when something does occur to damage them severely, they think maybe the trouble was that they did not trust hard enough. This can't be the answer to the problem, for this would mean that the basis for trust is your own ability or capacity for faith, and not the power and love of God.

It is true, however, that if your trust is in God you will not suffer harm. This is true, however, only if you think what is meant by "y o u." The essential YOU can never be hurt by what happens to your shell, so to speak. Take the case of a man who is paralyzed from the waist down. There may be no cure for him. He will have to live in a wheel chair all his life. Now his body has been injured. His circumstances, his prospects are changed for the worse, much worse. Yet his true self need not change for the worse. Think of all the people you know, brave and kind, with crippled half-dead bodies. What you have can be damaged and destroyed; what you are need never be, if you are joined with God by faith.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press Service.)

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

To be Careful With Fertilizers

Many crops will be planted in the next few months and tons of commercial fertilizers will be used. The proper placement of this fertilizer is very important; materials containing either nitrogen or potash should not come into direct contact with either seeds or plant roots; germination may be lowered or the small plant stunted. In most cases this complete fertilizer should be placed to the side and below the seed or plant root.

To Plant Less Tobacco

When supplies of a farm commodity exceed the demand, both at home and abroad, it seems quite sensible that a reduction in acreage might be one of the practices to help correct the situation. We hear of such plans on many farms throughout the area and urge all growers to cooperate in this effort; a reduction of 10% should not place much of a financial burden on any grower and it could mean greater return on labor for all growers. The practice of increasing acreage to maintain a certain gross income is to be discouraged.

To Vaccinate For Hog Cholera

The swine population of southeastern Pennsylvania is quite heavy and there is a lot of traffic in the moving of animals; small farms that are rather close together increase the danger of diseases. There is not any cure for hog cholera once the herd is infected — prevention by vaccination is the only means of protection. Too many hog producers are taking too much of a risk by not vaccinating.

To Ventilate Dairy Barns

Many herds of dairy cows will be getting lush pasture in the coming weeks; when these cattle are confined to the barn before and during the milking period, it is very important that the barn be well ventilated; exhaust fans should be opprovided to remove the grassy odors. Off-flavored milk is reason for rejection and dairymen the urged to manage carefully.

Young drivers in 1962 had the worst record of any age group in the United States. Men and women under age 25 represent only about 15 per cent of the nation's licensed drivers, yet they were involved in nearly 29 per cent of all fatal accidents and in more than 27 per cent of all non-fatal accidents.

County Agent Outlines Plan For Atomic Fallout Protection

Editor's note: This is the fi-become prepared and familiar rst of a series of articles on thewith the correct things to do farmer and fallout prepared byto meet such an emergency the county agent.

By: M. M. Smith
County Agricultural Agent

Many confusing statements have been made relating to the difficulty of the farmer to con-

Nobody likes to think abouttinue to produce food and fibwar and nuclear attack, how-er if our country suffered a nuccver, it is proper that everyonelear attack, or if our part of the country was faced with considerable radioactive fallout The fact is that there are definite and practical measures that farmers can take to protect their families and their livestock, feed, soil, water, and crops We urge all farmers to become acquainted with these important measures

First, let's examine some of the facts about radioactive fallout, which threatens the world's population today. Fallout is radioactive material, produced by a nuclear explosion, that falls to earth from the upper air. The course particles of this material fall close to the point of the explosion The fine particles may drift down wind for many miles — some for hundreds of miles before settling to earth. Fallout is odorless and may be as fine as invisible dust.

Particles of radioactive fallout emit radiation (similar to X-rays) that can change, damage, or destroy living cells If an area were to be highly contaminated by fallout, the radiation could injure or kill human beings and animals Such fallout could contaminate food, water, buildings, soil, and crops and make them unsafe for various periods of time

The greatest hazard from radiation would exist during the first few days following a hazard would decrease with the heavy deposit of fallout The hazard would decrease with the materials decayed and the intensity of radiation got lower. The proper course of attempted protection is to provide shelter for everything to be protected from this fallout The more dense materials such as soil, concrete, steel, wood insulation, or fiber that may be provided over and around humans, livestock, and food and feed supplies will give the greatest protection.

You might ask how we will know about the dangers of fallout, when we should take cover, and when we should come out Local civil defense authorities are responsible to broadcast this information to all citizens of the city and county.

HARRISBURG — Pennsylvania Secretary of Agriculture, Leland H. Bull, center, and NEPPCO (Northeastern Poultry Producers Council) officials — Richard I Ammon, Executive Director, right, and Harry F. X. Stults, Office Manager, both of Trenton, New Jersey, confer on plans for NEPPCO Exposition next Oct. 8-10 in Penna. Farm Show Building.

Swine Board Reorganizes

Lancaster County Swine Producers Thursday night reelected a full slate of officers for another year

C Warren Leininger, Denver R2, a breeder of purebred Spotted Hogs, was returned to the office of president. Leininger a consistent winner in the Spotted Hog classes at the Pennsylvania Farm Show and the Pennsylvania Livestock Exposition, is also president of the state Cooperative Swine Breeders Association.

Reelected vice president was Richard Maule, Quarryville R2, a breeder of purebred Berkshires James Z. Martin, Christiana R1, a breeder of purebred Yorkshires and Landrace, is secretary-treasurer.

The association's board of directors held the reorganization meeting in the exchange room at the Lancaster Union Stockyards.

Tree Suckers Need Pruning

Suckers should be removed from trees every spring, says Craig Oliver, Penn State extension ornamental horticulturist. Suckers sprout at the base of some trees and from the limbs of others. They are dominant in maples and fruit trees. By removing suckers before they form big branches, the tree's canopy is better aerated and its health improved.

About one-third of all pigs born never reach market. Cold, drafty, wet farrowing houses cause much trouble with baby pigs.

Martin's Limestone

Calcium and Magnesium are lost to the soil by leaching (a slow leaking away), and by removal of crops (such as hay and other greens). These need to be replaced by the application of limestone.

BEST FOOD BUYS

Pork Leads The Value Parade

Pork takes the spotlight among meat values this week at many area food stores. Harold Neigh, consumer marketing specialist at Penn State, reports that pork production is expected to be at near record levels. These heavy supplies are due to the increased pig crop of last fall which is now coming to market. He says prices may decline to the lowest level since early 1960. Freezer owners might find it profitable to stock their freezers with their favorite cuts during this period.

One of the best pork values on a meat-for-money basis is pork shoulder steaks or roasts. They may be sold boneless or with bone in, but nevertheless they are usually priced so that a serving is relatively economical. Pork loin roasts will be marked down for week end promotion at some stores Prices will vary between stores depending on the method of cutting, the size of the loin, and the amount of trimming. Some stores buy heavier loins than others and roasts cut from these bigger loins are priced a few cents per pound less. But, they may have more bone and fat than roasts from smaller loins. This may account for a price difference between stores. Loin roasts may be sold as rib or loin end, as a third of a loin or as a half loin. A half loin contains the choice center cut so it will cost a few cents per pound more than a rib end or loin end roast.

At vegetable counters asparagus and tomato prices are below those of a few weeks ago. Asparagus is now arriving from New Jersey as well as California Tomato prices vary widely with quality and kind Vegetables which offer low budget buys at this season are carrots, cabbage, old crop potatoes, onions, sweet potatoes, and radishes.

Crop Summary

Work Is Ahead Of Schedule

HARRISBURG — Reports that spring farm work was being aided by ideal weather conditions throughout the state, and that severe winter freeze damage was showing up in some orchards, featured the Service Tuesday weekly crop Pennsylvania Crop Reporting and weather summary, as released today.

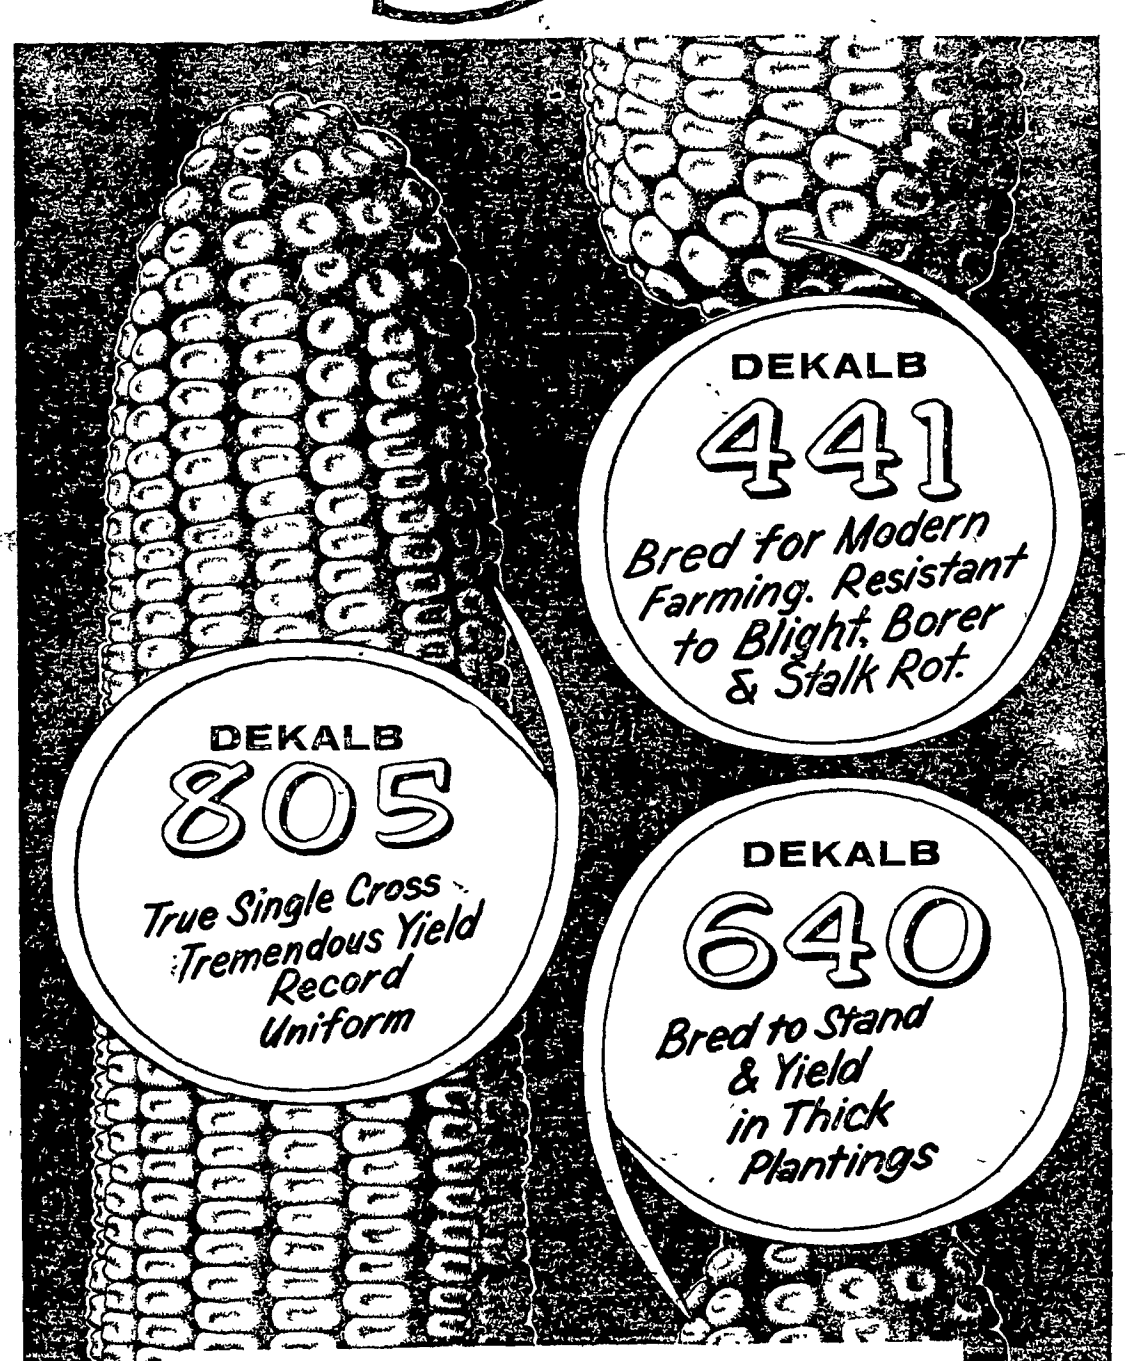
Good weather for field work enabled farmers to push ahead of schedule with spring plowing and planting. Although most sections of the state received some rain, soil moisture was still short in south central and eastern counties. Nearly half of the spring plowing has been finished throughout the state, and in some of the southern counties this work was nearing completion.

Planting of oats was almost completed. Mid-week showers help to "green-up" fall seeded wheat and barley with many of the spotty fields beginning to fill in Hay and pasture crops have been curtailed by the limited soil moisture Some fields in the Southeast were sprayed for spittle bugs and alfalfa weevils A few cattle were being pastured, but lack of growth has limited this to only a few scattered farms.

In the Lancaster area growers were sterilizing and planting tobacco beds. Planting of cobbler potatoes, early cabbeast. Harvest of asparagus and age, peas and other spring vegetables continued in the Southspring spinach got under way

The southern fruit areas has a profusion of blooms of cherries, plums, pears and peaches Full bloom for these fruits will follow in the more northerly counties a week to ten days later. Pre-season appraisals in the northern fruit areas of the state indicate cherries and peaches suffered severe damage from sustained sub-zero temperatures in late January and sub-freezing temperatures in early April immediately following a week of warm weather. Growers in the Berks-Lehigh area said they anticipate no more than a half crop of peaches Apple prospects were more encouraging.

THE BIG 3 that means MORE MONEY for PENNSYLVANIA FARMERS



TOUGH—that's the kind of seed corn it takes to make the BEST paying corn in Pennsylvania . . . and that's *exactly* the kind of seed corn DeKalb is! DeKalb's varieties for Pennsylvania are all bred and thoroughly tested for: 1—*high yielding ability;* 2—*top resistance to insects and disease* and 3—*the right maturity.* These 3 money-making features, *plus* those of *adaptability* to your soil and climate—*tough, strong stalks* and *high quality grain* should make you *more profit* from your own crop. Plant ALL DeKalb in 1963.

For the Farm Wife and Family

The Delectable Pork Chop

By Mrs. Richard C. Spence

Pork chops combine with many foods to make a delicious dinner. Sometimes we may want the succulent flavor of pork chops to complement an intricately-prepared side-dish; then again, the pork chops may be especially prepared to be the highlight of a meal. Whatever you may have in mind there is no need for any monotony when it comes to serving pork chops.

Pork Chops with Apple-Spice Noodles originates from a popular food combination. The spices blend beautifully with the light sweetness of the applesauce, which, in turn makes a delightful sauce for the tender noodles. Plump raisins accent the fruited noodles.

PORK CHOPS WITH APPLE-SPICE NOODLES

- 8 ounces wide noodles
- 6 pork chops, ½-inch thick
- Salt
- Black pepper
- 3½ cups applesauce (two 1-pound cans)
- ½ cup seedless raisins
- 1 teaspoon salt
- 1 teaspoon cinnamon
- ½ teaspoon nutmeg
- ¼ teaspoon ground cloves

Cook noodles in boiling salted water until tender, about 5 to 7 minutes. Season pork chops with salt and pepper to taste Brown in heavy skillet, remove and keep warm. Combine applesauce, raisins, 1 teaspoon salt, cinnamon, nutmeg and cloves in same skillet. Simmer ten minutes to develop flavor, stirring occasionally. Drain noodles. Add applesauce mixture to noodles, mixing well. Pour into greased 2-quart casserole. Arrange pork chops on top of noodle mixture and cover. Bake in slow oven (325 degrees) 1 hour or until pork chops are tender. Makes 4 to 6 servings.

MENU SUGGESTION: Pork Chops with Apple-Spice Noodles, Cabbage slaw, Pumpernickel bread, Butter, Coffee, Lime Sherbet, Lemon Cookies.

* * * *

STUFFED PORK CHOPS

- 6 double pork chops, pocketed
- 2 cups coarsely crumbled corn bread*
- ¼ cup finely-chopped celery
- 2 tablespoons chopped onion
- 2 tablespoons chopped parsley
- ½ teaspoon salt
- Dash pepper
- ¼ teaspoon marjoram
- ¼ teaspoon oregano
- 1 egg, beaten
- 3 tablespoons water
- 2 tablespoons melted butter or margarine

For stuffing, combine all ingredients. Fill pocket of each chop with ⅓ cup stuffing. Brown chops in a small amount of hot fat in large frying pan. Bake in covered ovenproof frying pan or baking pan in preheated moderate oven (350 degrees) about 1½ hours. Makes 6 servings.

*CORN BREAD

- 1 cup corn meal
- 1 cup sifted all-purpose flour
- 4 teaspoons baking powder
- ½ teaspoon salt
- 1 egg
- 1 cup milk
- ¼ cup shortening, soft

Sift together dry ingredients into bowl. Add egg, milk and shortening. Beat with rotary beater until smooth, about 1 minute. Do not overheat. Bake in a greased 8-inch square pan in a preheated oven (425 degrees) 20 to 25 minutes.

* * * *

SWEET AND PUNGENT PORK CHOPS

- 6 loin pork chops, 1 inch thick
- ½ teaspoon salt
- 3 large tart apples
- 5 tablespoons flour
- ¼ cup molasses
- 2 cups hot water
- 1 tablespoon cider vinegar
- ⅓ cup seedless raisins

Brown chops well on both sides in hot skillet. Arrange in shallow baking dish. Sprinkle with salt. Core and peel apples; cut in eighths. Place on chops. Add flour to fat in skillet; stir until browned. Combine molasses and water; add, and stir over low heat until mixture thickens. Add vinegar and raisins; pour over chops and apples. Cover and bake in moderate oven (350 degrees) 1 hour.

* * * *

FRUITED PORK CHOP BAKE

- 2 oranges, peeled, sliced into cartwheels
- 3 tablespoons molasses
- 6 to 8 loin pork chops or steaks (2 to 2½ pounds)
- Salt and pepper
- ¼ cup flour
- ¼ cup shortening or salad oil
- 2 teaspoons cornstarch
- 2 tablespoons molasses
- ½ cup water
- 1 cup orange juice
- ½ teaspoon marjoram
- 2 medium onions, peeled and sliced
- 2 tablespoons chopped parsley

Marinate orange slices in 3 tablespoons molasses. Trim ex-

tra fat from pork chops. Season chops with salt and pepper and lightly coat with flour. Heat shortening in large skillet; brown chops on both sides. Place browned chops in flat greased baking dish. Blend cornstarch with 2 tablespoons molasses; add water, orange juice and marjoram and pour over chops. Place onion slices on top of chops, sprinkle with parsley. Cover and bake at 350 degrees for 1 hour, or until tender. Arrange drained orange slices on top of cooked chops. Return to oven and heat. 6 to 8 servings.

* * * *

A nice accompaniment for simply prepared pork chops would be this Garden Noodle Loaf.

GARDEN NOODLE LOAF

- 8 ounces wide noodles
- 1 10-ounce package frozen peas and carrots (1½ cups)
- 3 tablespoons butter or margarine
- ¼ cup flour
- ¾ teaspoon salt
- ¾ teaspoon sweet basil leaves, crushed
- 1½ cups light cream
- 3 eggs, beaten

Cook noodles in boiling salted water until tender, 6 to 8 minutes. Cook peas and carrots according to package directions. Drain. Melt butter or margarine in saucepan Blend in flour, salt and basil. Add cream gradually, stirring constantly. Cook over low heat until smooth and thick, about 5 minutes. Add about half of sauce to eggs, stirring constantly. Add egg mixture to remaining sauce. Cook over low heat 1 minute, stirring constantly. Do not overcook. Drain noodles well.

Pour sauce over noodles and mix thoroughly. Using ⅓ of noodle mixture, line bottom of greased, foil-lined 9¼ x 5½ x 2¼ inch loaf pan. Spoon half of peas and carrots down center of loaf, leaving a 1-inch margin around edge. Repeat with another layer of noodles and a second layer of peas and carrots. Cover with last ⅓ of noodles. Place in pan of hot water, 1-inch deep. Bake in moderate oven (350 degrees) 30 to 35 minutes, or until silver knife inserted in center comes out clean. Unmold onto serving plate. Remove foil. Makes 4 to 6 servings.

* * * *

PARTY STUFFED TOMATOES

- 6 medium-sized firm tomatoes
- ⅓ cup chopped celery
- 2 tablespoons butter or margarine
- 1 teaspoon salt
- ¼ teaspoon pepper
- 2½ cups coarsely crumbled corn bread
- 2 slices bacon

Cut ⅛ inch slice from top of each tomato. Remove seeds and most of pulp, leaving a shell which will hold its shape (Reserve ⅔ cup of scooped out tomato pulp) Turn tomatoes upside down to drain. Lightly brown celery in butter in medium-sized frying pan. Add chopped tomato pulp, salt, pepper and crumbled corn bread. Mix lightly until ingredients are just combined

* * * *

A nice dessert to serve with pork chops —

LEMON SPICE PUDDIN' RING

- 2 cups sifted flour
- ½ cup sugar
- 2 teaspoons baking powder
- 2 teaspoons cinnamon
- ½ teaspoon salt
- ½ cup chopped nuts
- 1 6-ounce package lemon chips
- 1 egg, beaten
- 1 cup milk
- ¼ cup melted shortening or oil
- 1 tablespoon sugar

Sift together flour, ½ cup sugar, baking powder, cinnamon and salt Stir in nuts and lemon chips Combine egg, milk and shortening or oil. Add liquid ingredients to dry ingredients, stirring only until well moistened Pour batter into greased 1½ quart ring mold. Sprinkle top with remaining tablespoon sugar. (Sugar will melt during baking to form a glaze.) Bake in hot oven (400 degrees) 30 to 35 minutes Cool 10 minutes before removing from mold. Serve warm. If desired, pudding may be baked in 1½ quart casserole. 6 to 8 servings.

better, children feel, although the noise is already too loud for adults. A piece of string to tie the empty box around the child's neck and a couple of short sticks are all that's needed for the drum.

Provide ideas for rainy day fun, but let the children do the work . . . their fun is in the making as well as in the finished article.

About Dairy Sour Cream

Dairy sour cream adds a new flavor to family favorites.

Put a dab of sour cream on soups, vegetables, fruits, and desserts for an easy garnish.

Sour cream is a welcome addition in potato salads or on baked potatoes.

Use dairy sour cream in salad dressings.

When using sour cream, carefully fold it into other ingredients. Too much stirring may thin it. Add sour cream at the end of the cooking time because it should be heated gently . . . never boiled. In sauces, heat the sour cream over boiling water, not over direct heat.

Versatile Minced Onion

Instant minced onion saves time and tears and it adds flavor interest to many dishes Sprinkle a little onion into cooked vegetables with butter . . . it will perk up appetites.

Stir instant minced onion into gravies and fish sauces for a delicious quick flavor addition.

Blend instant minced onion with softened butter and prepared mustard. Spread mixture on bread and top with boiled ham and Swiss cheese. Pop into hot oven to melt cheese Makes tasty open-faced sandwiches.

Sound footing under cattle during transit will keep them quieter and make them easier to move from the vehicle without bruise-causing "bumps", suggests Livestock Conservation, Inc. Sand, sawdust, shavings, ground corn cobs, or similar material are recommended.

Farm Women 17 Sew Cancer Pads Make Donation

Farm Womens Society 17 sewed cancer pads at a recent meeting in the home of Mrs. Richard Lefever, Quarryville R1, near the Buck.

A donation of $5.00 was made to the Lancaster County society for Crippled Childrens and Adults.

The group's mother and daughter banquet will be held May 3 at the Dutch Dell, North of Buck on Rt. 72. The society will be the guest of society 6 in Elizabethtown on May 4.

Mrs. Pearl Wenger showed slides of a trip through the western U. S.

Next meeting of the society will be held at the home of Mrs. Ira Holtzhouer, New Providence, featuring a demonstration on beauty culture by Mrs. Ellen Musser. The meeting will be held on Tuesday, May 7, instead of the regular meeting day.

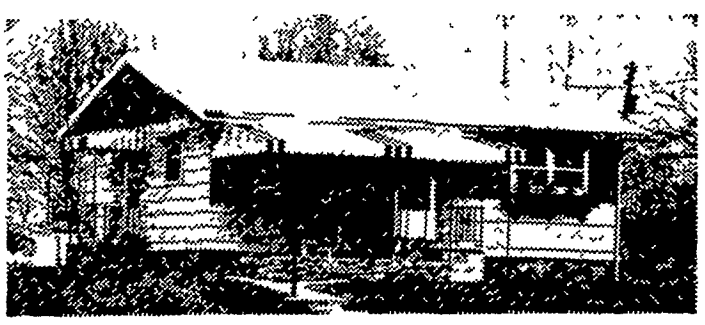
Skeptical at First... Now Biggest Booster of *Flameless* Electric Home Heat

Mrs. O. W. Anderson, 318 Grandview Boulevard, Bethlehem; read one of our recent newspaper advertisements featuring a number of Central Eastern Pennsylvania homes having flameless electric heat. She was so proud of her and her husband's decision, three years before, to install electric home heat, that she sat down and promptly wrote us the letter you see reproduced to the right, exactly as she wrote it.

What more can we say? . . . except to see *your own* electrician or electrical contractor, today, or get a *free* heating cost estimate on your home from one of our own home heating specialists.



PP&L
AN INVESTOR-OWNED ELECTRIC UTILITY IN THE SERVICE OF THE PUBLIC

Dear sirs,

After seeing the homes you have listed in the "Morning Call" with Electric heat, I feel I should write and tell you about ours.

I am enclosing a snap-shot so you can see it.

When we built it about 3 years ago we had Electric heat installed, and we can't say too much for our satisfaction and pleasure.

These cold days we have been just as cozy as can be and it is so clean, no film on knick-knacks or furniture.

The price is very cheap too, we were skeptical when we had it installed but find it is satisfactory in every way, with the year around plan for payments it is very convenient and we are more than pleased with it.

Yours truly
Mrs O. W. Anderson

Wheat Allotment Notices Mailed

Notices of 1964-crop wheat acreage allotments are being mailed to all wheat farm operators, on April 22, 1963, Fred Seldomridge, Chairman, Agricultural Stabilization and Conservation County Committee, has announced.

For most wheat farms, the Chairman explained, the allotment represents the farm's shar of the 1964 national wheat allotment of 49 5 million acres For small farms, however — those with wheat allotment of less than 15 acres, the allotment represents the larger of (a) the farm's allotment based on the national allotment, or (b) 90 percent of the farm's average 1959-61 wheat acreage, but not more than 15 acres.

Mr. Seldomridge pointed out that all the wheat produced on a participating farm's wheat allotment acreage may be marketed free of penalty if marketing quotes are made effective for the 1964 wheat crop All wheat from a farm which three base years 1959-61, however, would be subject to a marketing quota penalty.

The question of whether to use marketing quotes for the 1964 wheat crop will be decided by wheat growers in a referendum on May 21. "Small farm" operators will be eligible to cast ballots provided they register — by May 13 — their intention to participate in the 1964 program as an allotment grower They will do this by signing in the space provided on the back of the regular allotment notice, MQ-24, and filing the notice at the Agricultural Stabilization and Conservation Service county office before the deadline.

Under quotas, a small farm operator who does not elect to participate in the wheat program as an allotment grower would be able to stay out of the program, and plant wheat up to the larger of his 1964 allotment or his 3-year base (but not more than 15 acres) without being subject to marketing quota penalties Penalties would apply to wheat in excess of this limit. Such a grower will not be eligible to vote in the referendum, however, and he would not be eligible for price support or diversion payments.

If at least two-thirds of the growers voting in the referendum approve quotas for the 1964 wheat crop, price support will be available to participating growers who keep within their acreage allotment at (a) $2 a bushel, national average, on certificated wheat, and (b) $1 30 a bushel, national average, on noncertificated wheat; and diversion payments will be made to growers on acreage diverted from wheat production into a conserving use (including the arceage reduction reflected in the farm allotment).

If more than a third of the growers voting in the referendum oppose the 1964-crop wheat quotas, price support at 50 percent of parity (about $1.25 a bushel) will b available to participating growers who keep within their acreage allotments. Without quotas, no diversion program would be in effect. As in the past, the allotments will remain in effect, whether or not quotas are approved for the 1964 wheat crop..

Farm Writer Is Honored

Ovid A. Martin of the Associated Press was awarded the annual J S Russell Memorial Award for distinguished service to agriculture

Mr Martin of the AP's Washington Bureau was presented the award at a banquet of the Newspaper Farm Editors Association during the organization's annual Spring meeting Monday night in the Hotel Washington The award by the N.F.E.A. honors the late J S Russell, long-time farm editor of the Des Moines (Iowa) Register and Tribune, a founder of the N.F E A , and an outstanding figure for many years in agricultural activities, public and governmental.

Mr Martin is the third member of the N F E A. to be honored. He was named for informed and comprehensive reporting of agricultural news and a rare degree of professional excellence, which has contributed to a better public understanding of farmers and farm problems.

The 59-year-old newsman has covered the Department of Agriculture and farm news throughout the country since 1937.

Glenn Hess Is 4-H Tractor Driving Champ

Glenn Hess, Washington Boro R1, was crowned champion 4-H tractor driver of Lancaster County last Saturday at Farmersville He won the right to represent the county in the state 4-H contest on August 13 at Penn State University

Ribbons and trophies were awarded to the ten top competitors in the field of 13 contestants Kenneth Shertzer, last year's winner placed sixth.

Other placings were 2, Nelson Martin, Ephrata R1, 3, Kenneth Rutt, Quarryville R2; 4, Stanley Leininger, Denver R2, 5, Kenneth Shertzer Millersville R1, 6, Gerald Martin, Ephrata R1, 7, Daniel Rohrer, Manheim R1, 8, Eugene Bollinger, Denver R2 9, David Zimmerman, Reinholds R1, and Ronald Denlinger, Lancaster R3.

Lincoln 4-H Names Leaders

Robert Hoover, Denver R2, was elected junior leader and delegate to county council by the Lincoln Community 4-H club at a recent meeting Also elected junior leader was Ned Bushong, Lititz R1.

Jerry Snader, president, was in charge of the meeting in the Mount Airy fire hall.

After the business meeting a Stanley demonstration was presented and refreshments were served Next meeting will be held on May 21 at 7 30 p. m in the Mount Airy fire hall.

Many olive branches also have a lemon on them, it seems

County Student On Dean's List At Penn State

Kenneth D. Sauder, son of Mr. and Mrs Harvey E. Sauder, Earl Earl R1, has been named to the Dean's list for high academic achievement at the Pennsylvania State University.

The announcement was made by Dr. Lyman E Jackson, dean of the school of agriculture at the university.

Kenneth, a graduate of the Garden Spot High School, New Holland, in 1962, and recipient of the Keystone Farmer degree in the state Future Farmers of America, is majoring in general agriculture at Penn State.

Forestry Club Goes On Tour

Members of the 4-H Forestry Club of Lancaster County were guests recently of Mr. and Mrs. Paul E. Case, owners of the Pleasant Grove Nursery located near Pleasant Grove.

Mr. Case took the group on an interesting hike through the woodlands near the Nursery, which was enjoyed by all He then explained the germination of seeds followed by a demonstration on the construction of seed beds ending an entertaining tour.

No person ever becomes so lost to decency that he can't see duty of others

4-H Holstein See Demonstration

Elam Bollinger and John Shelly, leaders in the county 4-H Holstein club presented a fitting demonstration at a meeting of the club on the Bollinger farm, Manheim RD, Thursday night.

The club voted to sponsor a booth at the County Council 4-H Spring Jamboree in Leola Memorial hall, May 3.

Next meeting of the club will feature judging practice on the farm of Ray Harbold, Elizabethtown RD, on May 23 at 7:30 p.m.

Thirty seven members were present at Thursday's meeting.

● Wheat Legislation

(Continued from Page 1)

readers; There won't be any other wheat legislation if the referendum fails."

He said there will be very little change in the status of the small farmer if the referendum carries, but there will be a "big change" if it is defeated. "It would mean demorilization of the wheat market."

Representative Robert Pogue of Texas, chairman of the feed grains sub committee said, "I will work for another bill if the wheat vote fails, but I don't see much hope for passage." He said most congressmen would take a negative vote to mean that farmers do not want any wheat legislation. "I do not believe we can convince the urban congressmen to vote again on farm legislation, if the wheat referendum does not carry." he said.

However, Albert Quie, representative from Minnesota, said, "I have already drafted a bill to be presented in the event the referendum fails."

Ellender, in a sharp attack on the American Farm Bureau Federation, said the national organization is misleading the farmer by promising a much better program if they vote the proposed bill down. "The Farm Bureau is offering nothing better. They propose only a land retirement program, and that's not good for anyone." he said. "We have had all the soil bank program we want."

Representative Quie, in answer to a question as to his thoughts on the "Farm Bureau" first said, "No Comment.", but in an aside he added, "if you can't say something good about someone, don't say anything."

Freeman said he is hopeful that the referendum will carry, but whether it does or not, the vote will not change the direction of the total agriculture program. Wheat is only one commodity, he said. The rest of the agriculture picture will not change in the face of a defeat of the wheat referendum. Cotton, feed grain, and dairy programs will go on, with some modifications, he said.

In the only concession to the insistence that congress might pass some wheat legislation if the May 21 vote should be negative, Ellender said, "Some of the kinks might be ironed out of the present law, but there will be NO new legislation introduced."

● U.S. To Spend

(Continued from Page 1)

employed on farms — in 10 years.

He said most opportunities for rural advancement lie in the field of rural recreation. Most existing recreational facilities are badly overcrowded and those owned by the federal government are largely long distances from centers of population.

In the long range view, he said, the land used for recreational activities will take some of the pressure off the commodity groups.

Top priority will be given to development of income-producing outdoor recreation facilities, he explained.

At the editors' annual banquet later in the day, George Kyle, of the newly formed Bureau of Outdoor Recreation in the Department of the Interior, reiterated Baker's views when he said, "Today's level of outdoor recreation is too great for existing facilities. By the turn of the century, it is estimated that our population will double and outdoor recreation will triple."

He said we need a policy for outdoor recreation development, guidelines for resources, extension and modification of existing programs, a focal point of management and grants in aid programs. The new bureau, he explained, is a focal point for outdoor recreation between the states and the federal governments.

"There will soon be an appeal made for the states to form outdoor recreation bureaus." he said.

Secretary of Agriculture, Orville Freeman, in answer to a question said, there has been very little criticism thus far in response to F H. A. loans made for recreational facilities. "I'm sure there will be some. It is a new program, and a break with tradition," he said.

Last week a loan was made to a North Carolina farmer for development of a golf course. "Farmers have been interested. The politicians and farm organizations have tended to scoff." he added.

All events indicate that we have a resource which will be good for the country and the people, Kyle said.

shared the top dairy honor with Glenn Musser Brubeker, a senior and son of Mr and Mrs. Paul Brubaker, was named 1962 Pennsylvania Holstein Boy.

Other foundation award winners Star Green Hand, James Nolt, mechanics, Glen Musser; livestock, Larry Brubaker, and public speaking, Carl Ginder.

Speakers at the awards banquet, attended by 130 persons, were Donald Fogel, immediate past president of the state FFA, and Clarence Bauman, state FFA sentinel.

CHECKERBOARD service bulletin

Next winter's egg profits...
depend on what you do this spring!

What determines laying house profits? Price of eggs? Disease? Cost of feed? Rate of lay? Yes... all these are important, but record-keeping Eastern poultrymen will tell you the biggest factor of all is *the kind of a pullet you start with!*

They're not talking about the different strains, necessarily. They're merely saying that pullets started and raised *right*—with the best of breeding, feeding, sanitation, and management—invariably make more eggs and more money than those raised any other way. In fact, poorly raised pullets sometime fail to make a return over feed cost!

So raise them on the Purina Program. We'll help you all we can with advice on debeaking, housing, feeding. We have Purina disease treatments and wormers with Research-approved directions on how to use them. We'll help you wind up next fall with a bunch of big, sturdy, Purina-fed pullets developed to return good money for you in the laying house.

A cow with boots . . .

Farmers know that cattle must have dry feet. MARTIN'S BARN-DRI dries damp and wet floors immediately.

MARTIN'S BARN-DRI also helps prevent costly animal loss by reducing slipping when floors are wet.

Use MARTIN'S BARN-DRI for all animals — cattle, hogs, horses, chickens, pets, others. Scatter by hand or shovel. Buy by the bag or ton.

ternational Farm Youth Exchange (IFYE) Program. He will show slides and tell of his varied and interesting experiences while living with farm families on the island.

The Lancaster County Senior Extension Club has just organzied for another year and it extends a special invitation to any young person from the County between the approximate ages of 18 to 30 to attend this meeting and become active in the Club activities. The Club membership which represents various occupations, meets monthly for educational, community service and soical purposes. For further information contact Mr. Victor Plastow, Associate County Agent, who is advisor to the Club.

4-H Dairy Club Leaders To Meet

In an effort to bring uniformity to the instruction of 4-H dairy club members, a meeting of all dairy club leaders in the county has been scheduled for next Tuesday, Victor Plastow, associate county agent said this week.

Extension dairy specialist, Paul Anderson from the Penna. State University will present a special demonstration on fitting the dairy heifer for show during the meeting on the farm of Herbert and Rhelda Royer, 2025 Oregon Pike, Lancaster, at 8 p.m., April 30.

It is important that all members be given the same fitting information so that all will have equal opportunity when they show their project heifers, Plastow said.

Pasture Cows Carefully

Dairymen like lush pastures for their dairy cows, but Joe Taylor, Penn State extension dairy specialist, sounds a warning. The change from winter feeding can cause mastitis. He advises feeding some hay and grain before cows go out to pasture each day early in the season.

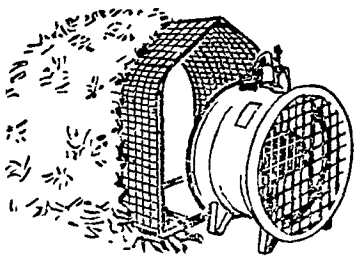
CLAY Crop Driers



For Hay and Corn

Often pays for itself the first year by reducing field losses and improving quality. Double protein content of hay . . . at a power cost as low as 50c a ton! And cut corn losses by picking earlier. You'll save soft corn by drying to safe moisture level with a CLAY Drier.

CLAY Crop Driers offer natural or heated air. Portable—for batch or bin drying. Ask us about our "Pay-as-you-dry" Purchase Plan.

Boost total farm profit... PICK FROM THE ***BIG FAMILY***

P-A-G HYBRIDS

As your P-A-G dealer, I will gladly show you how P-A-G's *big family* approach gives you a wider choice of hybrids . . . lets you build a team of hybrids that can boost your total income from corn. I'll also explain how a P-A-G corn program works to boost all-around efficiency, no matter if you grow corn for cash or for livestock.

I've got all the information you need on P-A-G's famous FD-100, Ranger, Vernal, Buffalo and California Common, and I'll be glad to help you pick the ones that best fit your requirements. Sow these seeds with assurance. They have been tested and approved by P-A-G.

Solanco Future Farmers Win Regional Contest

Lancaster County's entry in the Region II FFA Parliamentary Procedure contest beat out all competition in the 12 county southeastern Pennsylvania region Thursday to win a shot at the state title.

A sharp, confident team of eight Future Farmers from Solanco exhibited skills in conducting a meeting according to "Roberts Rules Of Order". They will compete for state honors during FFA Week at the Pennsylvania State University in June.

Glenn Weber, Mohnton R2, a member of the Glasslands Chapter FFA, New Holland, took third place in the Public Speaking contest held in conjunction with the Parliamentary Procedure demonstration in the Millersville State College.

Glenn, the son of Mr. and Mrs Andrew Weber, is a ninth grade student in vocational agriculture at the Garden Spot High School He had placed second with his speech, "The Race Between Food and People.", in the York-Lancaster area contest on April 8. His placing on Thursday won for him a second alternate position in the state public speaking contest during FFA Week.

Solanco's team included the following vocational agriculture students Robert Wenger, Quarryville R1, president; R. Edwin Harnish, Christiana R1, vice president; Kenneth Whiteside, Kirkwood R1, secretary; Jay Ranck, Quarryville R2, treasurer, Larry Trout, New Providence R1, chaplain; John Frey, Quarryville R2, student advisor, Charles Craig, Nottingnam R2, reporter, and William Ulrich, Peach Bottom, sentinel.

William M Fredd, teacher of vocational agriculture at the Quarryville school is coach of the team.

● Senator Says

(Continued from Page 1)

ject to a referendum of dairy farmers

"Whether or not the dairy bill passes will depend on the dairy industry" Secretary of Agriculture, Orville Freeman, said.

Make It Easier

Labor is one of the major costs in a poultry enterprise, says Carl Dossin, Penn State extension poultry specialist. He stresses the adoption of methods that permit poultrymen to take care of more birds, do a better job and do it in less time Save five steps in a day and you save a mile a year, he claims

● Cloister FFA

(continued from page 1)

and Jake Keller, Stevens R1, and John Haldeman, Reinholds, who each got a Hampshire gilt.

John Varner presented his speech, "A Permanent Agriculture" which he entered in the area public speaking contest on April 8.

Lewis Ayers, teacher of vocational agriculture at the school showed slides and reviewed the work of the chapter during the year.

Clarence Bauman, Lancaster R7, state FFA sentinel brought greetings from the state association and outlined the duties of a state officer. He encouraged all members to work for a state office. "The challenge is great, but the experience is excellent." he said.

ALL WHEAT GROWERS

including those growing 15 acres or less

YOUR VOICE IS IMPORTANT

in the coming wheat referendum.
Your 15-acre exemption will be eliminated and a system of tight restriction controls is proposed.

Congress feels that you should have a voice in this.
The decisions based on this vote may well have FAR REACHING effects on the course of agriculture and your business of farming in the future.

If you are opposed to:

a. **Strict Controls.**
b. **The classification of soft red wheat in the same set of controls as the REAL SURPLUS hard varieties.**
c. **To giving others the power to plan your farm's production.**

Then —

DON'T STAY AWAY BUT REGISTER and VOTE

On the other hand, if you favor the proposed program your vote is also IMPORTANT. It takes two-thirds of you to make it effective.

REMEMBER:

This time the small man has a VOICE. USE IT!
There is no telling when small Pennsylvania wheat growers MAY GET THIS CHANCE AGAIN.

You can vote
for
or
against

But,

Whether you are for or against, you CANNOT participate if you do not register NOW, and to register you must sign form MQ-24, Notice of 1964 Wheat Farm Acreage Allotment, and get it to your County A.S.C. office on or before MAY 13.

The day to Vote is MAY 21.
